Contents of Volume 9 1991

Number 1 1991

Newsline 1

Calendar 3

A.M. Rajendran, R.K. Garrett, Jr., J.B. Clark, and T.L. Jungling
Effects of Strain Rate on Plastic Flow and Fracture in Pure Tantalum 7

N.-M. Wang and V.C. Shah
Drawhead Design and Performance 21

N. Chandra and K. Chandy
Superplastic Process Modeling of Plane Strain Components with Complex Shapes 27

T.I. Liu, E.J. Ko, and S.L. Sha
Diagnosis of Tapping Operations Using an AI Approach 39

CNC Software, Inc.
CNC Programming System Helps Ford Reduce Protype Leadtime and Cost and Improve Quality 47

Instructions to Authors on page iv

Indexed in *Metals Abstracts, Engineered Materials Abstracts*, and *World Aluminum Abstracts*

Number 2 1991

Newsline 51

Calendar 54

S. Thiruvarudchelvan and J.G. Gan
Drawing of Conical Cups with Friction Actuated Blank Holding 59

M.S. Ragab, A.S. Wifi, and G.M.A. Galal
On the Deformation of Bimetal Wires by Drawing 67

O.A. Kaibyshev, A.G. Merzhanov, N.G. Zaripov, L.V. Petrova, O. Yu. Efimov, and A.N. Pityulin
High Temperature Plasticity of Titanium Carbide in the Low Area of Homogeneity 77

J.A. Schey and R.F. Fischer
Effects of Clamp Force in Limiting Dome Height (LDH) Test 85

S.E. Homer and R.D. VanLuchene
Aircraft Wing Skin Contouring by Shot Peening 89

J. Duszczyk
Plasticity Theory for Working of Porous Metals 103

D. Rusia
Review and Evaluation of Different Methods for Force and Torque Calculations in the Strip Rolling Process 117

Instructions to Authors on page iv

Indexed in *Metals Abstracts, Engineered Materials Abstracts*, and *World Aluminum Abstracts*

Number 3 1991

Calendar 127

S. Thiruvarudchelvan and A.C. Lua
Bulge Forming of Tubes with Axial Compressive Force Proportional to the Hydraulic Pressure 133

Y. Wang, A.E. Bayoumi, and H.M. Zbib
An Experimental/Analytical Approach to Study Formability Using a Punch Test 143

F. Liu and R. Sowerby
The Determination of Optimum Blank Shapes When Deep Drawing Prismatic Cups 153

T.I. Liu
Development of New Drill Geometry and Its Performance Evaluation **161**
J.G. Lenard
Measurements of Friction in Cold Flat Rolling **171**
Instructions to Authors on page iv
Indexed in *Metals Abstracts*, *Engineered Materials Abstracts*, and *World Aluminum Abstracts*

Number 4 1991

Announcement **181**
A.S. El-Gizawy
Novel Processing Method for Metallic Materials **183**
S.S. Lanka, R. Srinivasan, and R.V. Grandhi
A Design Approach for Intermediate Die Shapes in Plane Strain Forgings **193**
S. Ishii, Y. Inami, and T. Akasawa
Application of Alumina Fiber Reinforced Plastics as a Grinding Material **207**
R. Cirino, A.E.M. Pertence, and P.R. Cetlin
Mechanical Properties of Previously Annealed or Cold Rolled Aluminum Submitted to Tension/Bending .. **213**
D.F. Carbaugh and J.L. Frater
A Factorial Analysis of Input Parameters Using Finite Element Techniques **221**
Q.Q. Nie and D. Lee
The Effect of Rate Sensitivity on History Dependent Forming Limits of Anisotropic Sheet Metals **233**
M.Y. Demeri and S.C. Tang
Computer Simulation and Experimental Validation of Stretch Flanging **241**
M.F. Shi and J.C. Gerdeen
Effect of Strain Gradient and Curvature on Forming Limit Diagrams for Anisotropic Sheets **253**
Index to Volume 9 ..... **269**
Instructions to Authors on page iv
Indexed in *Metals Abstracts*, *Engineered Materials Abstracts*, and *World Aluminum Abstracts*
